Jodene Sasine

Jodene Sasine has over 30 years of experience developing software systems for Aerospace, Automotive, and Consumer Goods industries. Her areas of expertise and interest are Agile software methodologies, software model-based engineering, project management, and software development. Her experience spans a variety of domains including aerospace systems, customer relationship management systems, connected vehicle technologies, product data management systems, enterprise data warehousing, and operations & demand planning systems. She joined the Aerospace Corporation in El Segundo California in 2017. In that time, she has supported multiple MILSATCOM, launch, and other related programs. Ms. Sasine is a Certified Scrum Product Owner, SAFe Government Practitioner, PMI-certified Project Management Professional, and has been a practitioner of Agile methodologies since 2002. Ms. Sasine received her B.S. in Computer Science and an M.S. in Computer Science from Loyola Marymount University, Los Angeles, CA
