Daniel Winton

Daniel B. Winton Winton is a Senior Project Engineer at the Aerospace Corporation with 32 years of industry experience. As a Practicing Digital Engineer, he applies expertise in Model Based Systems Engineering (MBSE), Simulation, Systems Engineering and Systems Architecting, as well as acquisition, risk, requirements, cost, scheduling, software, systems integration and databases to solving hard and sometimes not well-defined problems. This is all part of Digital Engineering. Mr. Winton holds two MS degrees from the University of Southern California (USC), one in Systems Architecting and Engineering (MSSAE) and another in Systems Management (MSSM).
